& Mrs. Teresa*

News

In room 2, our art projects consisted of painting octagon shapes with colors from the month for the sensory aspect of our curriculum. We also did our warm and cool water experiment outside and the babies enjoyed that feeling. In the classroom we explored our piece puzzle and slide box which helped with our motor skills. We always love crawling through the tunnel, it helps us understand inside and outside! The summer flew by we are excited to start the new school year with fresh faces!

Room 3
Mrs. Vanessa & Ms. Jazmin

News

Our Little firecrackers had a blast in July! They are learning to line up at the door for outside play. They are such big helpers when it's time to pick up toys. We are also learning to use our words when we need help such as, " more food please". We are going to miss our splash days in room 3, but we are ready to kick off the new school year!

Room 4
Mrs. Theresa &
Ms. Tatianna

News

We had fun learning about water and made an aquarium in a sensory bottle to explore with. Our friends also enjoyed making cute handprint ducks along with footprints as sailboats. Room 4 enjoyed learning about frogs so we sang a song called, "Frogs in the Pond", and painted frog feet! We had so much fun this summer, lets see what the month of August brings us!

Room 5
Ms. Kayla, Mrs. Mariana, &
Ms. Kaitlin

News

I can't believe we are almost at the end of summer. This month we created life size body art, and learned about how each and everyone of us is unique in our own way. Then we got a little sticky with science experiments, and made messy art with yummy snacks. Next, we traveled in time to learn about dinosaurs and did some archaeology activities along with a dirt dessert. Room 5 got crafty with some pots and made special art for the classroom. Overall, July was a blast, and we are ready for the new school year!

Room 6
Ms. Brianna & Ms. Bri

News

July Was filled with adventure in room 6! We “rocked out” for Geology week and created our own rocks with sand, glitter, and pebbles! We even made fossils and learned how fossils are made. During anatomy week, we learned about what's inside and outside our body. We had a fun experiment with chocolate and bananas to show how our skin protects us. During chemistry week we made “lcky lck” with corn starch and water. We had the opportunity to observe how it reacted with each other. In our last week of archeology, we made “Dirt Desserts” with chocolate pudding, Oreos, and cool whip, and dug in to eat it! This past month was so busy, but we are eager to learn more in August!

Michelle, & Ms. Jillian*

News

During the month of July, we had an incredible time learning about geology, anatomy, chemistry, and archeology. Our favorite week was chemistry, and we had a blast mixing ingredients and watching chemical reactions. A special thanks to our parents for going above and beyond during dress up days. We can't wait to see what August is going to bring to our classroom!

Room 8
Mrs. Rachel & Ms. Jenecia

News

In the month of July we learned so much that included making fossils, dirt desserts, and slime. Room 8 enjoyed making their own rocks and musical instrument. Our science experiments focused on our stem curriculum and we had so much fun doing it! Our friends are ready to jump into August!

& Ms. Katie*

SUMMER

Cool

News

Our summer campers had so much fun in July! They learned about several countries such as Jordan, China, Egypt, France, and India. The campers even tasted some yummy food from the countries such as "Paneer Pakoras" from India, and egg rolls. We did a lot of crating and made Pharaohs and Jewels, a Henna Hand craft, and paper lanterns. Our class had several cooking experiments, and learned so much on our Tech Tuesdays thru virtual learning. We've done so much this month and ready to end our summer with a bang!
