

OUR PHILOSOPHY

MISSION STATEMENT

Our goal is to nurture the development of each child's full potential intellectually, emotionally, socially, and physically in an atmosphere of safety and trust.

CORE VALUES

CONTAGIOUS ENTHUSIASM:

- We believe that passionate teachers and staff members can make a difference in the lives of the children and families we serve.
- We believe in the use of positive discipline strategies that lead children to become selfdisciplined.

SUPPORTIVE COLLABORATION:

- We believe that it takes teamwork between school and home to develop healthy brains, bodies, and best behaviors in children.
- We believe that honest and frequent communication between the school and the home positively impacts children's success.

STRIVING TO BE ONE STEP ABOVE:

- We believe that high quality early education is a commitment to do everything one step above what is acceptable, and we strive to rise above "average."
- We believe in the importance of continuing professional development and personal growth through educational opportunities and supportive communities of learning.

TREATING ALL WITH DIGNITY:

- We believe that each child is an individual, with his or her own unique set of passions, strengths, talents, and gifts.
- We believe that early education professionals provide early learning experiences that meet the educational neeas of children with consideration of the community culture in which their family lives.
- We believe in the importance of teaching character values, and more important, in modeling their use in our interactions with children, their families, and one another.

ALWAYS DOING WHAT IS RIGHT:

- We believe that every child has a right to excellence in all aspects of early childhood education.
