

# July Newsletter

## Director's Corner

Sunshine days!! I can hear that old song! With so much sunshine ahead we are having lots of fun in our classrooms both inside and outside. As we move through July we are continuing our daily learning experience through play, engagement and interactions.

The summer calendars are an accurate overview of what is happening in the classrooms each day. Ahead this month we are welcoming the exotic animal show, continuing in our splash pad fun and creating lots of messy art. With our current safety procedures in place we are aware that it can lead to questions with respect to program quality, activities and how my child is doing. Beginning in July we will be creating small video segments of classroom environments and sending them to our families with our update emails a few times each month. This will allow families to see inside their child's classroom and follow the activities as they are happening. Each week when you take your child's bedding home you will also receive a small update note about their weekly activities and wellness. As you come to check in and out each day there is also a communication box located on the table. Please feel free to let us know what we can do for you, ask how your child is doing and any feedback that you may have. We look forward to sharing the month ahead with you!

Tara

## Safety & Wellness

As we all continue to learn and navigate our temporary "new normal" surrounding COVID 19 the safety and wellness of each child, family member and staff member is our daily priority. Please join us as we continue to practice the following wellness procedures:

1. Drop off and pick up procedures will take place on the front patio.
2. Temperatures of all children and those dropping off will be taken.
3. Please sign your child in or out and share with us any daily directives
4. Our child will be taken in or brought out to you by a staff member
5. Please maintain social distancing and sanitize your hands

We invite each of our families to follow us on Facebook and the Children's Lighthouse Website for program updates and information. We are also sending regular parent information emails. We appreciate your communication!
