

The Next Generation in IAQ

REME • HALO™

By RGF INTERNATIONAL, INC.

The REME•HALO™ neutralizes odors, particulate, air pollutants, VOCs (chemical odors), smoke, mold bacteria and viruses.

Guardian Air™ [REME•HALO™] is proactive and sends ionized aggressive advanced oxidizers into conditioned areas to destroy pollutants at the source, in the air and on surfaces, before they can reach humans.

The breakthrough in the RGF advanced oxidation technologies is a group of oxidants known as HydroPeroxides. Ionized-HydroPeroxides™ are proven to be very effective at destroying harmful microbials in the air and on surfaces.

Over the past 20 years, RGF has more than one million Advanced Oxidation products successfully in use worldwide without any safety problems.

**Kansas State University Study:
The Sneeze Test**
REME•HALO™ sends Advanced Oxidants throughout the room to kill microbials at the source. Average sneeze microbial reduction: 99%

*Independently tested on surfaces and airborne: 99+% kill rate. Note: The REME cell is not a medical device and no medical claims are made.
